PROFILE

Highly skilled and results-driven Web and Mobile App Developer with expertise in the MERN stack and React Native. Adept at building scalable, responsive, and user-friendly web applications and mobile solutions. Proficient in developing full-stack applications using MongoDB, Express.js, React, and Node.js, as well as crafting seamless cross-platform mobile apps with React Native. Known for delivering efficient, maintainable code and collaborating effectively with teams to sachieve project goals.

WORK EXPERIENCE

Currently working in HMS Tech as a Web-App Developer in MERN Stack and Android Developer in React Native.

Worked as an intern at CSOFT System, focusing on web application development. Gained hands-on experience in building and maintaining responsive web applications, utilizing modern tools and technologies. Collaborated with the team to deliver high-quality solutions, further enhancing my technical and problem-solving skills.

JOB   RESPONSIBILITIES

Job Responsibilities in a Project-Based System
- Collaborate with cross-functional teams to understand project requirements and deliver tailored solutions.
- Develop and maintain Web-App and mobile applications.
- Write clean, efficient, and scalable code while adhering to coding standards and best practices.
- Participate in code reviews, testing, and debugging to ensure high-quality deliverables.
